

Redbird Mathematics Parent/Guardian Welcome Letter

We are excited to inform you that your student currently has an account for Redbird Mathematics. This account was obtained through your student's academic institution. Redbird Mathematics is a web-based math curriculum that leverages adaptive technology and a student-centered, personalized learning model to accelerate learning for all students. Students will have access to Redbird Mathematics anywhere a broadband internet connection and modern device are available. This means that students can access Redbird at school and at home.

To access Redbird Mathematics your student will go to his/her district portal OR to my.mheducation.com and login with the username and password provided by your school below:

Username: _____ Password: _____

Students should work independently on Redbird Mathematics. Redbird is adaptive and is always assessing your student's understanding of the content being presented. This means that the program learns about your student based on their performance and their patterns of responses. When your student works independently, they will receive the right amount of instruction and practice delivered at just the right time.

You can monitor student progress using the Student Snapshot. This can be accessed through the student platform after logging in by clicking on "View My Progress" in the upper-right corner of the screen.

To learn more about Redbird Mathematics, go to www.RedbirdLearning.com, click on the "Programs" tab, and select "Redbird Mathematics."

Recommended Solutions for Accessing Redbird Math

Operating Systems

- macOS 10.12 (Sierra)
- iOS 11.0
